

Optimized mAbs production

Hybridoma Base Medium

- › **Comprehensive solution:** thawing, expansion and production can all be performed in the same medium, regardless of the scale
- › Optimized for the demanding metabolism of hybridoma cells, e.g., human, mouse, and rat hybridomas and myelomas
- › Chemically defined, serum-free, animal component-free and hydrolysate-free
- › Little or no adaptation required from serum-containing media
- › Supports stable growth at high viability in seed train culture
